

## 次の計算をしましょう。

$$2km500m - 700m = 2500m - 700m$$

$$= 1800m$$

$$= 1km800m$$

$$3km500m - 800m = 3500m - 800m 
= 2700m 
= 2km700m$$

$$\begin{array}{c}
9 & 2 \text{km} \, \text{I} \, \text{00m} - 950 \text{m} = 2 \, \text{I} \, \text{00m} - 950 \text{m} \\
&= 1 \, \text{I} \, \text{50m} \\
&= 1 \, \text{km} \, \text{I} \, \text{50m}
\end{array}$$

$$2 3km250m - 600m = 3250m - 600m$$

$$= 2650m$$

$$= 2km650m$$

$$4 \text{ km}50\text{m} - 400\text{m} = 4050\text{m} - 400\text{m}$$
  
=  $3650\text{m}$   
=  $3\text{km}650\text{m}$ 

$$\begin{array}{l}
6 & 2 \text{km} 900 \text{m} - 950 \text{m} = 2900 \text{m} - 950 \text{m} \\
&= 1950 \text{m} \\
&= 1 \text{km} 950 \text{m}
\end{array}$$

$$3km300m - 850m = 3300m - 850m 
= 2450m 
= 2km450m$$

$$3km700m - 800m = 3700m - 800m$$

$$= 2900m$$

$$= 2km900m$$
