

次の計算をしましょう。

$$| | 850m+400m = | 1250m = | 1250m$$

$$\begin{array}{l}
2 & 6 \text{km} | 50 \text{m} + 850 \text{m} = 6 \text{km} + 150 \text{m} + 850 \text{m} \\
&= 6 \text{km} + 1000 \text{m} \\
&= 7 \text{km}
\end{array}$$

3
$$8 \text{km} 700 \text{m} + 800 \text{m} = 8 \text{km} + 700 \text{m} + 800 \text{m}$$

$$= 8 \text{km} + 1500 \text{m}$$

$$= 9 \text{km} 500 \text{m}$$

$$= 9 \text{km} 500 \text{m}$$

$$= 650 \text{m} + 550 \text{m} = 1200 \text{m}$$

$$= 1 \text{km} 200 \text{m}$$

$$5 320m+700m = 1020m$$

= $1 km20m$

$$5 km550m+800m = 5km+550m+800m$$
$$= 5km+1350m$$
$$= 6km350m$$
