計算をしましょう。

$$\begin{aligned} 1 \quad 4 + (26 - 5) &= 4 + 21 \\ &= 25 \end{aligned}$$

$$\begin{aligned} 2 \quad 24 - (3 + 9) &= 24 - 12 \\ &= 12 \end{aligned}$$

$$\begin{aligned} 3 \quad 25 - (9 - 2) &= 25 - 7 \\ &= 18 \end{aligned}$$

$$\begin{aligned} 4 \quad 41 - (14 + 4) &= 41 - 18 \\ &= 23 \end{aligned}$$

$$\begin{aligned} 5 \quad 72 + (33 - 5) &= 72 + 28 \\ &= 100 \end{aligned}$$

$$\begin{aligned} 6 \quad 137 - (37 + 10) &= 137 - 47 \\ &= 90 \end{aligned}$$

$$\begin{aligned} 7 \quad 28 + (166 + 46) &= 28 + 212 \\ &= 240 \end{aligned}$$

$$\begin{aligned} 8 \quad 338 - (346 - 340) &= 338 - 6 \\ &= 332 \end{aligned}$$

$$\begin{aligned} 9 \quad 498 - (143 + 131) &= 498 - 274 \\ &= 224 \end{aligned}$$

$$\begin{aligned} 10 \quad 124 + (264 + 382) &= 124 + 646 \\ &= 770 \end{aligned}$$
