

● 次の分数のたし算をしましょう。

$$1 \quad \frac{3}{4} + \frac{4}{9}$$

$$= \frac{27}{36} + \frac{16}{36}$$

$$= \frac{43}{36} \left( 1 \frac{7}{36} \right)$$

$$2 \quad \frac{5}{7} + \frac{3}{8}$$

$$= \frac{40}{56} + \frac{21}{56}$$

$$= \frac{61}{56} \left( 1 \frac{5}{56} \right)$$

$$3 \quad \frac{3}{5} + \frac{2}{3}$$

$$= \frac{9}{15} + \frac{10}{15}$$

$$= \frac{19}{15} \left( 1 \frac{4}{15} \right)$$

$$4 \quad \frac{1}{2} + \frac{3}{5}$$

$$= \frac{5}{10} + \frac{6}{10}$$

$$= \frac{11}{10} \left( 1 \frac{1}{10} \right)$$

$$5 \quad \frac{4}{9} + \frac{5}{8}$$

$$= \frac{32}{72} + \frac{45}{72}$$

$$= \frac{77}{72} \left( 1 \frac{5}{72} \right)$$

$$6 \quad \frac{2}{3} + \frac{5}{9}$$

$$= \frac{6}{9} + \frac{5}{9}$$

$$= \frac{11}{9} \left( 1 \frac{2}{9} \right)$$

$$7 \quad \frac{5}{7} + \frac{10}{21}$$

$$= \frac{15}{21} + \frac{10}{21}$$

$$= \frac{25}{21} \left( 1 \frac{4}{21} \right)$$

$$8 \quad \frac{3}{5} + \frac{8}{15}$$

$$= \frac{9}{15} + \frac{8}{15}$$

$$= \frac{17}{15} \left( 1 \frac{2}{15} \right)$$
