

● 次の分数のたし算をしましょう。

$$1 \quad \frac{4}{3} + \frac{5}{8}$$

$$= \frac{32}{24} + \frac{15}{24}$$

$$= \frac{47}{24} \left(1 \frac{23}{24} \right)$$

$$2 \quad \frac{3}{4} + \frac{5}{7}$$

$$= \frac{21}{28} + \frac{20}{28}$$

$$= \frac{41}{28} \left(1 \frac{13}{28} \right)$$

$$3 \quad \frac{3}{7} + \frac{4}{5}$$

$$= \frac{15}{35} + \frac{28}{35}$$

$$= \frac{43}{35} \left(1 \frac{8}{35} \right)$$

$$4 \quad \frac{5}{14} + \frac{6}{7}$$

$$= \frac{5}{14} + \frac{12}{14}$$

$$= \frac{17}{14} \left(1 \frac{3}{14} \right)$$

$$5 \quad \frac{11}{15} + \frac{1}{3}$$

$$= \frac{11}{15} + \frac{5}{15}$$

$$= \frac{16}{15} \left(1 \frac{1}{15} \right)$$

$$6 \quad \frac{13}{27} + \frac{2}{3}$$

$$= \frac{13}{27} + \frac{18}{27}$$

$$= \frac{31}{27} \left(1 \frac{4}{27} \right)$$

$$7 \quad \frac{2}{3} + \frac{8}{21}$$

$$= \frac{14}{21} + \frac{8}{21}$$

$$= \frac{22}{21} \left(1 \frac{1}{21} \right)$$

$$8 \quad \frac{2}{3} + \frac{5}{12}$$

$$= \frac{8}{12} + \frac{5}{12}$$

$$= \frac{13}{12} \left(1 \frac{1}{12} \right)$$
